MANY SEEK CADETSHIPS

Great Rush of Applications for Appointment to the Academies.

Over a Thousand Petitions Received by the President Alone Since Congress Provided for the Increase at West Point and Annapolis-Senators Aleo Besieged by Aspirants.

The provision made by Congress for a large increase in the number of appointments of cadets to the Military and Naval academies, has resulted already in the receipt of a great number of applications by Senators and by the President.

Hereafter the number of annual appointments to the Military and Naval academies will exceed any previous record in the history of those two institutions. The output of these schools will therefore be Guy M. Babcock, who spent ten years on considerably increased and the number of the plains with him, and served with him new officers added each year to the two branches of the service greater than ever

Congress having given to the Senators for the first time the right of naming cadets to West Point this variety of patronage is likely to cause some trouble, and probably before many years have passed Senators vill regret the new conditions which have imposed on them the necessity of selecting young men for cadetships. Both laws are at once effective and the rush of appli-cants for appointments will no doubt continue until all vacancies have been filled. Over 200 such appointments will be made, of which 175 are now available, and of these 110 belong to West Point and about sixty to Annapolis. No time has been lost in preparing for the selection of these young men. While the law does not specifically state that Senators shall have the privilege of nominating cadets to the privilege of nominating cadets to West Point, this has been construed by the Secretary of War to be its intent, and accordingly, a circular letter will be malled to each Senator requesting that he name a principal and alternate for West Point not later than July 10, and at the same New Yesters. time notifying them that the entrance ex-

will be filled by the department. This very
action resulted some years ago in a provision by which the Secretary of the Navy

Army men as a rule have no legal residence, and few can expect favors from members of Congress. Hence the President has invariably adhered to the policy of his predecessors in reserving places at West Point and Annapolis for boys whose family connections are closely identified with the Army or Navy.

CLEMENCY FOR MURDERERS.

Action in the Cases of the Assassins of Sergeant Votrie. report from General Otis, while he

was still Military Governor of the Philippines, was received yesterday by the War Department. The report relates that three natives were convicted by a military commission of having murdered Quartermaster Sergeant Albert Votrie, of Company K, Thirty-ninth Volunteer Infantry, at the Barrio of Bagbag, near Tanauan, in the province of Batangas, February 2, and were sentenced to death by hanging.

In passing upon the case General Otis s the final reviewing authority, said that the findings of the commission were fully sustained by the evidence, and that the death sentence imposed by it had the express sanction of the laws of war. He was, owever, unwilling to direct the execuof the sentence, as he believed that the accused were influenced to commit the crime of which they were convicted by local guerrilla chiefs, who, he said, were the principal criminals in the affair. Moreover, he said, the prisoners were ignorant of the legal consequences of their act. Therefore he commuted the systemes in each case to imprisonment at hard labor in the Presidio

de Manila.

"The clemency herein exercised," said General Otis, "will not be considered a precedent to guide or influence the future action of the reviewing authority upon proceedings of military commissions in cases of such gravity as the present one, and the occasion is taken to announce that in the judicial determination of questions of guilt which involve responsibility for the unlawful taking of human life the full rigor of the law will be inflicted when rightfully invoked by legally constituted courts."

RUSH OF OFFICE-SEEKERS.

District Commissioners Besieged by Applicants for Positions

The rush of office-seekers to the District Building has been uninterrupted since the organization of the new Board of Commissioners. Each of the members of the Board is obliged to spend several hours every day in receiving delegations who call to urge the appointment of some one to one of the departments of the municipal government. Private individuals call claims, and all these people have to be listened to and the candidates they present

taker into consideration.

Commissioner Macfarland has been specially busy ever since he came into office in listening to the friends of rival candidates for appointment on the School Board. Commissioner Ross has been visited daily by scores of applicants for positions on the police force or in the garbage service. Captain Beach has the troubles along the same line by all kinds of applicants going to him to secure his vote in the final action of the Roard when the lists whill be tion of the Board when the lists shall be
